Work Experience

Re:Soft   **Tbilisi, Georgia**
Full-Stack Developer Intern   *Sept-2024 - present*

- As a full-stack developer, I leverage Next.js, Node.js, and MongoDB to create cutting-edge web applications. My expertise spans front-end and back-end, ensuring top-notch user experiences and scalable solutions.
- Technologies: ReactJS, NodeJS, ExpressJS, NestJS, MongoDB, JavaScript, TypeScript, SASS

Projects

Solar System | *React js, Vite, TypeScript*

- Built an interactive solar system app with animated planets and real-time data, providing users with a visual understanding of the solar system's scale and mechanics.

Alliance-loyalty (Re:Soft) | *Next js*

- As a Web Developer, I leverage Next.js to create cutting-edge web applications. My daily tasks involve building dynamic and reusable components and pages, ensuring top-notch user experiences and scalable solutions. Developing highly interactive features while maintaining performance and flexibility across the application.

Movie-web | *Next js, Firebase, TypeScript*

- As a Web developer, I leverage Next.js, Firebase, JavaScript, and TypeScript to create this movie web application. My expertise spans front-end and back-end, ensuring top-notch user experiences and scalable solutions. Currently, this website is still in progress and remains an ongoing personal project.
- Technologies: NextJS, JavaScript, TypeScript, firebae,Formik/Yup, Framer-Motion, SASS

Rest-Countries | *React js, Vite, TypeScript*

- This project involves handling API requests to fetch country data and display it dynamically on the front end. It utilizes routing for seamless navigation between different country details, providing a responsive and interactive user experience. My approach ensures efficient API handling and a scalable solution for managing country data.
- Technologies: ReactJS, TypeScript, Vite, Styled-Components

Education

Tbilisi State University   **Tbilisi, Georgia**
Bachelor of Computer Science (in progress)   *2021 - present*

Re:Educate   **Tbilisi, Georgia**
Full-Stack Web Development course   *2023 Sep - 2024 July*
<u>View Certificate</u>

Skills

Languages: English, Georgian

Tech Stack: TypeScript, Next.js, React, NodeJS, ExpressJS, NestJS, Docker, JavaScript, Swagger, Rest API, Tailwind CSS, Postman, Git/Github, HTML/CSS, JQuery, Ant Design, Bootstrap.
