

Ivane Gdzelishvili

Frontend Developer

gdzelishviliv@gmail.com • Tbilisi, Georgia • (+995) 599 26 07 80 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Professional Summary

Frontend Developer with 3+ years of experience building scalable web applications using React, Next.js, TypeScript and Svelte. Experienced in admin dashboards, REST API integrations, authentication systems, and payment gateway integration including Bank of Georgia (BoG). Focused on performance, reusable architecture and production-ready frontend systems.

Technical Skills

Frontend: React, Next.js, Svelte, TypeScript, JavaScript, Tailwind CSS, SCSS, TanStack

Backend: Node.js, Express, NestJS

Database: MongoDB, Firebase

Tools: Git/GitHub, Docker, Postman, Swagger

Core: REST APIs, Authentication, Admin Panels, Payment Integration, Performance Optimization

Languages: English, Georgian

Work Experience

Rowix

Front-End Developer

Tbilisi, Georgia

Dec 2025 – present

- Developed production-grade web applications using React, Next.js, TypeScript and Svelte.
- Built complex admin dashboards for platform management.
- Integrated Bank of Georgia (BoG) payment system including checkout, saved cards and transaction flow.
- Worked with REST APIs, authentication and backend integration; built reusable UI components and optimized performance across devices.

Re:Soft

Full-Stack Developer Intern

Tbilisi, Georgia

Sep 2024 – Dec 2025

- Built full-stack applications using Next.js, React, NestJS and MongoDB.
- Developed reusable frontend components and REST APIs.
- Worked with Docker, Git, Swagger and Postman; implemented responsive UI with TypeScript and SCSS.

Selected Projects

Alliance Loyalty | [Next.js](#) – [ally.resoft.dev](#)

- Enterprise loyalty platform with scalable architecture, dynamic reusable components, and API integrations.

Movie Web | [Next.js](#), [Firebase](#), [TypeScript](#) – [live demo](#)

- Movie web app with authentication and responsive UI, built with Firebase, Formik/Yup, and Framer Motion.

Solar System | [React](#), [Vite](#), [TypeScript](#) – [live demo](#)

- Interactive solar system app with animated planets and real-time data visualizing scale and orbital mechanics.

Education

Tbilisi State University

Bachelor of Computer Science (in progress)

Tbilisi, Georgia

2021 – present

Re:Educatе

Full-Stack Web Development Course

Tbilisi, Georgia

Sep 2023 – Jul 2024
